

DENTRO

A Hybrid Blockchain Solution to the Planet's Re-greening and Independence of Crypto Economy.

BACKGROUND

PLANET RE-GREENING:

The planet we inherited was a beautiful home, and nature in its kindness was a perfect one. So perfectly green that men were lost in time due to longevity, until the quest for exploration was awoken in mankind like the breath of dinosaur.

Nature adorned humanity with various plants and trees in their billions, ranging from shrubs, domestic trees, cash crops and other economic trees. Seeing all the craft of nature displayed in trees, men could thankfully say our land was green. It is a general knowledge that the bulk of oxygen gas consumed by human beings come from the plants and trees.

This phenomenon remained uninterrupted until the advent of industrial revolution, and thus the beginning of an ending to the serene planet and balance in nature. The unquenchable thirst for exploration in human resulted into uncontrollable encroachment into the Agrarian space, thereby leading to loss of abundance treasure embedded in the forest, as encapsulated in trees.

Industrialization ushered humanity into acidic era of atomic, construction of roads, rail lines, office complexes, residential apartments, to list a few at the detriment of nature. And from that moment, the earth planet began to lose its identity, as our thick and tall forest have been increasingly replaced with skyscrapers.

“WE WISH WE KNEW BETTER”.

INDEPENDENCE OF CRYPTO-ECONOMY:

The ceaseless pursuit of freedom has driven men to major discoveries, innovations and inventions too numerous in human history. And it will go well to say *"the most disruptive of them all is the invention of blockchain as a technology, and cryptocurrency as its first application"*.

This is essentially because, this invention has threatened the status quo and long-standing monopoly of control by the various governments over the creation of money, its usage and distribution, which was made possible, given the concept of decentralization and cryptography on which the blockchain technology was based.

Over the years, and since the publication of the thesis by Satoshi Nakamoto (2008) cum the invention of bitcoin (2009) as the first cryptocurrency, this new sub-sector of financial industry has witnessed a tremendous growth, owing to the series of applications and usages to which the cryptocurrencies have been put. The cryptocurrency industry is now over \$2Trillions in capitalization and indications reveal that the industry is still at its budding stage with so much potential for growth.

Today, there are coins/tokens for the blockchain and exchange utility functions, memes, games, NFTs, metaverse, to mention but a few use cases. These efforts of the pioneers have increased the popularity and adoption of cryptocurrencies, mostly among the tech oriented specialists, financial traders and investors, who are well informed of the potentials of the internet and World Wide Web.

However, this growing crypto-economy still remain at distant from realizing its potential, as it faces stiff opposition from the government establishments, majorly central banks/federal reserves, who feel this industry threatens the control they have over the money and finances. The regulatory challenges being faced by the established authorities have reinforced the hostilities and this invention has been repeatedly defined in the context of societal vices, like terrorism financing, money laundering, kidnappings ransom payment to mention but a few.

All these were pre-conceived to deter the masses from involving in crypto related transactions, and in some cases, a number of actions have been taken by various governments to alt the progress of the industry through policies directed at limiting the supports of institutions. Whereas, cryptocurrency as a financial innovation will not be realizing its potential until the masses are free to use it in assessing their daily needs and should not be referred as a currency, if anything at all.

On a further scrutiny of the industry, it was revealed that the successes recorded by the pioneers in over a decade have not significantly reflected and affected other adjoining productive industries. Little wonder that an industry of this magnitude have not really supported the creation and manufacturing of daily items, automobiles, hotel, resorts, educational and recreational facilities, as well as the plantations to mention a few, which would have further expanded the usability of cryptocurrency as a financial asset. This failure has undoubtedly increased the dependence of cryptocurrencies' adoption on the whims of established fiat oriented organizations, who managed to dare the dictates of their regulators.

The consequence is that with a simple joke from these few CEOs and corporations, volatility would ensue in the prices and values of the underlined digital asset(s). This messy phenomenon revealed the fragility of this industry and the failure of cryptocurrencies as a store of value.

It is therefore obvious that until the developers of coins and tokens realize the need to found, co-found, or partner in the creation of organizations that will use their digital asset, their coins, tokens and by extension the industry, will continue to be at the mercy of the few actors, who manipulate the industry for their gains.

DENTRO PROJECT

DENTRO is conceived to address the two identified banes affecting both our planet-earth and cryptocurrency as a new financial asset and innovation, thus we aim to pursue the twin missions of planet re-greening and independence for crypto-economy.

We aim to drive the gains from ranges of economic activities as designed towards sustaining the crypto-economy and ensuring a safer and habitable planet, granting continuous existence of human race and other living species.

ETIMOLOGY

DENTRO is derived from the Greek word "Δεντρο" meaning "The Tree". Therefore, Dentro project takes its root from the consideration of TREE as a crucial element necessary for the prosperity and survival of our earth and all the things that inhabit it.

Trees are vital. As the largest plants on the planet, they provide us with oxygen, store carbons, stabilize the soil and give life to the world's wildlife.

THE GOALS

DENTRO project is established to pursue two main goals; the re-greening of the planet and the independence of crypto-economy.

PLANET RE-GREENING:

As reiterated in the background to this whitepaper, this planet has been grossly abused, through ranges of extractive and explorative activities of men. Once blooming forests are now covered by various residential and commercial structures across the globe.

Deforestation is going at an alarming rate and substantial land spaces are increasingly lost on annual basis.

Therefore, DENTRO project aims to harness its resources towards planting of trees, establishments of forests, greening of metropolis, and creation of game reserves through collaboration with central, provincial/states and rural governments, as well as parastatals and non-governmental organizations, who share the same ideal of creating a peaceful, serene, safe and habitable planet.

This indeed is a charitable mission which will be executed by the foundation arm of the DENTRO project. Thus, 20% of the project token-Dentrocoin has been earmarked for this purpose, while proposing additional commitment of certain proportion of the profits accruing from the economic holdings of the DENTRO project in various business ventures it found, co-found or partnered to build in the course of actualizing its crypto-economy independence agenda.

The progress of the entire project will be measured in how far it has accomplished the re-greening agenda as anchored by the charity arm. Therefore it is proposed that the burning of Dentrocoin is proportional to the number of trees planted by the foundation.

So, every year, the project decides to burn 1000Dentrocoin for each Tree planted in the course of the year. The more the trees planted, the less the Dentrocoin in existence, and scarcer Dentrocoin becomes.

INDEPENDENCE OF CRYPTO-ECONOMY:

This is a grand measure to take cryptocurrency adoption to another level. As a token development project, we resolve to take the cryptocurrency to the people, localized the cryptocurrency usage and define a template, which any project aiming mass adoption must embrace.

We present a complete pack and deliver an ecosystem that eases adoption for the masses. Therefore, we are setting pace in the area of creating businesses for the assessment of the masses' daily and recreational needs in supermarkets, restaurants, game arcades, plantations, hotel and resorts, oil and gas stations, etc. We shall be the force behind the creation of crypto oriented business organizations that will enable the masses to access their daily needs with cryptocurrencies.

Instead of waning our energy in pleading for organizational adoption, we choose to build parallel establishments that deliver on the same business purposes and more efficiently, while using cryptocurrency as the principal medium of payment to access the products and services they offer.

When we have achieved this, the cryptocurrencies' users will not be faced with the challenges to convert their digital assets to fiat currency before they access their respective needs. And more importantly, more and more existing but currently fiat based will gradually embrace the new reality which we have brought upon them, the adoption of cryptocurrencies as a medium of receiving payment.

To achieve this goal, this assignment shall be undertaken by the Business arm of the project- DENTROBIZ and the template will be replicated across the continents and countries, navigating through different regulations guiding the business conducts in various regions and affected industries. We duly realise this as a necessary struggle, as we are convinced of the victory for all the enthusiasts in this heroic undertakings.

Meanwhile, we have incorporated the need for mass orientations targeting the local population in any given region. Therefore, in each country where we have succeeded in establishing the physical use cases like restaurants, supermarkets, gas stations, hotels, resorts, plantations etc., it has been designed as an integral part of our business to locate an information unit for the image building and orientation of the populace through online and terrestrial radio service of our own.

DENTRO ECOSYSTEM

Dentro project is designed in such a way to support the actualization of the stated project's twin purposes. The ecosystem has been reviewed and the following form the core of its components:

- Dentrocoin: Dentro project's token
- Dentro-MS: Dentro project's Merchant Software
- Dentro-Biz: Dentro project's Business Arm
- Dentro Foundation: Dentro project's Charity Arm

Each of the above components of the project's ecosystem are highlighted as follows:

DENTROCOIN

Dentrocoin is the token of Dentro ecosystem. Dentrecoin is a BEP20 verified smart contract executed on Binance Smart Chain as a utility token for the accessing of services within Dentro ecosystem.

Dentrocoin is designed as a reflective, auto-yield, auto-liquidity generating token which adds to the liquidity pool, while compensating every holders on every given transaction.

The total supply of Dentrecoin is 500,000,000 DENTRO.

SUMMARY USECASES OF DENTROCOIN

As the token for accessing all services and products within Dentro Ecosystem, Dentrecoin will be used for following purposes:

- Dentrecoin as a token for exchange of products from Supermarket, Eateries, gas stations and plantations offers through DentreBiz
- Dentrecoin as a token for accessing services offered through DentreBiz
- Dentrecoin will be used for Global Airtime Top-up
- Dentrecoin will used as an investment tool through staking service
- Dentrecoin will be used to collect donations and grants by the Dentre Foundation

- Through Dentro-MS, Dentrocoin will be universally adopted by merchants for various business purposes
- Dentrocoin is positioned in the market places as a Mother token, bridging the gap between other cryptocurrencies and the market. You can swap other cryptocurrencies to Dentrocoin to assess services and products on various business platforms created by DentroBiz

DENTROCOIN TOKENOMICS

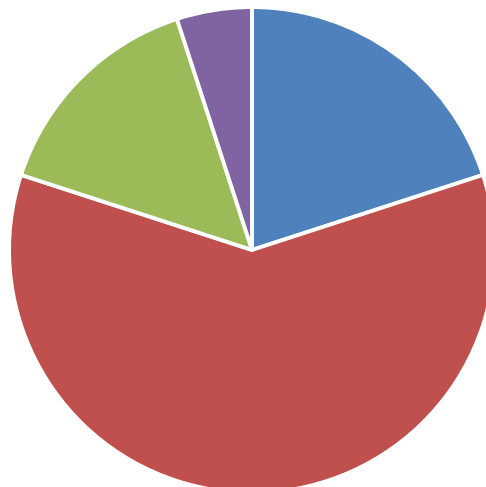

- Token name: Dentrocoin
- Symbol: DENTRO
- Type: BEP20
- Decimal: 9
- Blockchain: Binance Smart Chain (BSC)
- Contract Address: 0xae5C84e1dfA1696949E67a2bBb2c9C91E4079007
- Maximum Supply: 500,000,000 DENTRO

DENTRO-MS

DENTRO-MS is a merchant software solution to ease the institutional adoption of Dentrocoin, while taking cognizance of accounting, Sales, stocktaking and other related business activities' demands which may mitigate the switching of merchants from fiat to cryptocurrency usage in their business affairs.

DENTRO-MS is a complete software package for the merchant business effective running.

DENTRO-MS takes twin consideration of countries fiat currencies' switch, while retaining Dentrocoin as the universal unit of account.

Therefore, **DENTRO-MS** will provide twin values for each items in both the given country's currency and Dentrocoin to facilitate proper accounting and control of the business

DENTROBIZ

In building a solid ecosystem that reinforces the actualization of Independence of Crypto-economy ideal of this project, there was the consideration for the necessity to build parallel business establishments that will serve the same purposes that FIAT oriented establishments are serving across various sectors of economy.

Therefore, an arm of DENTRO project tagged "**DENTROBIZ**" is mandated to front the establishment of these business platforms through founding , co-founding and /or partnering interested existing organisations to build outfits that will offer the basic products and services to the masses in Restaurant, Super market, Hotels, Resorts, Agricultural plantations, Real estate, Oil and gas, etc. These establishments will use Dentrocoin as the principal currency of exchange.

This is considered paramount as it will greatly advance the adoption of Dentrocoin by the masses and facilitate the advancement of this sub-sector of finance industry.

Through **DENTROBIZ**, we shall take Dentrocoin to the people in various countries of the world. It is noteworthy that currently **DENTROBIZ** has recorded its successful experiment in Nigeria, West Africa, having been instrumental to the formation of Dentlink International. With its package of restaurants, supermarkets, game arcades, bakeries, and radio studios as an information agent to reach the locals, while demystifying all vices attributed to cryptocurrencies as a new payment solution.

This will be replicated in other parts of the world, as the laws and regulations guiding service provision and finance in each countries are fully scrutinized.

Once we set this pace, it will be easier for other set-ups to follow suit and cryptocurrency can eventually take its place as a universal tool of payment.

“We believe until this goal is realized and masses begin to assess their daily needs in various market places (online and physical), cryptocurrencies cannot be effectively defined in the context of “medium of Exchange”

DENTRO FOUNDATION

FOUNDATION is the charity arm of this project with mandate to cover the planet in green through planting of trees , establishment of forest and game reserves , as well as beautification of Schools, Hospitals, Roads and other important urban places with green plants.

Dentro foundation will become a mother body to countless non-profit making organisations across the countries of the world, who share the same ideal to save this planet earth.

In addition to the greening agenda, Dentro Foundation will carry out empowerment schemes to the indigents and artisans as well small business holders as a means to penetrate the masses and enshrine Dentro culture among masses who are key to the advancement of crypto adoption.

Dentro Foundation will award scholarships to schools and less privileged in the society as a charity function to advance the course of humanity

To fund these, 20% of the deployed token Dentrecoin has been allotted to the planting of trees and other charity functions of Dentro Foundation. This is in addition to yearly grants from the profit generated on

DENTRO-BIZ activities.

With Dentro-Biz continuous funding, Dentro-foundation will have enough ground to explore this principal goal that borders on saving our planet and humanity from extinction.

In the overall, Dentro foundation will uphold the charity collaboration of this project with the governments and their respective agencies in any given region, where the planting activities takes place, since the job of resting human race from extinction is a collaborative deal.

DENTRO COMMUNITY

Dentro project is a movement whose goals centered on the involvement of its community members, who are honorably referred as “DENTRO SPARTANS”. The Telegram, Facebook, Instagram, YouTube and Twitter are good mediums explored in connecting our community members. Dentro community will receive a boost as more use cases are launched.

The consequence is a direct impact on the growth of Dentrocoin holders. We aim to surpass the records of the highest holders in this industry, as we take on uncommon path towards crypto adoption, taking the usefulness of this financial innovation to meet the masses at their door steps, knowing that the masses constitute the largest in any given population.

As well, through the outreach and collaborations of Dentro Foundation, there will be a platform for the mobilization of Non-Governmental Organisations who share the same ideals and will share the Dentro ideals across the nooks and crannies of the world.

MARKETING

Marketing is certainly the bedrock of any organisation, and DENTRO is not an exception. The marketing plan for the promotion of Dentrocoin is woven around every component of the DENTRO ECOSYSTEM; the DentroPay, the Dentro-MS,

the Dentro-BIZ, Dentro Foundation and Dentrocoin itself. The success of one will affect the other.

Dentrocoin is the fuel that powers the wagon of the entire system. From the deployed token, 5% has been allotted for marketing purposes and of course 2% reflection tax on transactions. This is intended to cater for online and offline exposures of the project, exchange listings and other conventional promotional media.

Dentro Foundation through its collaborations across the world will reinforce awareness for the token, whose major preoccupation is to make the earth better and secure for human living.

Dentro-MS will ease the institutional adoption of Dentrocoin. It will provide software solution which otherwise would have been difficult to deal with in their decision to switch into accepting the cryptocurrency as a payment option and in solving their accounting related problems.

LEADERSHIP AND THE TEAM

DENTRO is the physical manifestation of the vision of its Founder and CEO, Barmytee, whose purpose is fueled by his desire to see this planet recovering from her abuses and degradation, having foreseen the inherent capacity of blockchain technology as a leverage to find a holistic solution to both the loophole in the current state of the crypto-economy and the need to return the planet to green state.

He provides the leadership for the team, whose members are drawn from across various fields, countries and continents to deliver on the stated twin purposes of DENTRO PROJECT.
